

BULLFROG

2-way Monitor with 15"/1,5 -Driver

set up as a stable phase point source

Crossover frequency 680 Hz

Power handling: 450 W max.

Frequency response: 35 Hz – 20 kHz

Impedance: 8 Ω

Pure analogue Version with Cass A Amplifiers

Most compact two-way monitor 15" Bass (38 cm),
with a central spherical horn, very linear,
plays loud and low volumes, high efficiency and capacity.

Is mainly used for studio monitors worldwide.

The compact size (45 x 45 x 45 cm and 24 kg weight) makes it
easy to handle and simple to transport.

Standard: Birch surface with Stained Colour (freely selectable)
with clear Varnish Finish,
Veneer or other paints on request!
External passive crossover, Internal on demand.

The point source makes it particularly suitable for
smaller and 'difficult' rooms.

Very clear and delicate acoustic pattern, virtually free from discolouration
and also optimal for voice and music.

Because of its universal areas of application, it is equally suited to operation
with smaller thoroughbred valve amplifiers as well as being able to deliver
unbelievably from large power amps.

Optional extras:

side handles, high stand suspension, bar mounting,
Stands with resonance-damping feet.
