

3-Way-System

Crossover frequencies: 100 Hz - 600 Hz

Big Horn-Diameter: 110 cm

Small Horn-Diameter: 54 cm

total Depth: 76 cm

Bass-Corner-Horn: 26 Hz - 100 Hz

18" Bass-Driver

In each region you get the highest possible efficiency.

That means that the electrical signal
is transformed with the highest speed and sensitivity.

This you can clearly hear.

The area between 100 Hz- 20 KHz is a point source.

The Bass is driven by an adjusted Corner Horn

We recommend our own
Class A Electronic.

AEONOR is now the youngest of this long development.

...listening tells more than many words.

We invite you for a demonstration!!
